

TERMS OF USE FOR POLICYINTELPRO PRODUCTS

OWNERSHIP

All content, research, summaries, analyses, benchmarks, metadata, ontologies, classifications, taxonomies, datasets, indices, derived metrics, trend indicators, and related intellectual property remain the exclusive property of BCMstrategy, Inc. (“Company”) which publishes PolicyIntelPro. PolicyIntelPro products include, but are not limited to, publications branded as “Briefing” and/or “POLI Signal”, publication archives, document repositories, and blogposts on PolicyIntelPro websites as well as any APIs, RSS, MCP, or other technology systems created by Company to deliver PolicyIntelPro products and other Company data products including, but not limited to, PolicyScope Data generated by Company’s patented process.

No ownership rights to any of the above-referenced products are transferred through subscription.

INDIVIDUAL SUBSCRIBER LICENSE

Subject to payment of applicable subscription fees, Company grants Subscriber a limited, revocable, non-exclusive, non-transferable license to access and read the content for Subscriber’s personal professional use.

Subscriber may not:

- redistribute content;
- resell content;
- republish content;
- provide content to third parties;
- create derivative commercial products based upon the content;
- use content to train machine learning models;
- use content to train foundation models;
- use content to train agentic systems;
- incorporate content into retrieval-augmented generation systems;
- incorporate content into knowledge graphs;
- build commercial datasets from content;

- expose content through APIs;
- expose content through MCP servers;
- expose content through internal enterprise search systems.

MACHINE RIGHTS RESERVATION

All rights relating to machine-readable access, machine consumption, machine learning, artificial intelligence, retrieval systems, agent systems, model context protocols, APIs, vector databases, embeddings, semantic search systems, and automated processing are expressly reserved by Company.

No subscription grants any right to:

1. ingest Company content into AI systems;
2. create embeddings from Company content;
3. create vector databases using Company content;
4. expose Company content through machine interfaces;
5. permit AI systems to answer questions based on Company content;
6. create derivative retrieval systems;
7. create MCP servers utilizing Company content;
8. expose Company content through internal copilots or assistant systems.

Such uses require a separate written license from Company.

LIMITED PERSONAL AI USE

Subscriber may use de minimis excerpts for personal productivity purposes when interacting with commercially available AI tools.

However, Subscriber may not:

- upload substantial portions of the archive;
- upload systematic collections of content;
- create persistent retrieval systems;
- create searchable archives;
- automate extraction from the service.

ENTERPRISE USE RESTRICTION

No individual subscription may be used to support:

- teams;
- departments;
- business units;
- internal knowledge portals;
- enterprise copilots;
- enterprise AI assistants;
- enterprise search systems.

Enterprise use requires an Enterprise License.

API AND MCP RIGHTS

Company may offer separate licenses for:

- API access;
- data feeds;
- enterprise integrations;
- machine-readable content;
- model context protocol access;
- knowledge graph access;
- index access;
- ontology access.

No such rights are included with a subscription unless explicitly stated in writing.

ANTI-CIRCUMVENTION

Subscriber shall not:

- scrape the platform;
- systematically download content;
- harvest content through automated means;

- bypass access controls;
- create substitute databases;
- create competing services using Company content.

AUDIT PROVISION

Company reserves the right to conduct reasonable usage audits upon notice where there is evidence of unauthorized redistribution or machine-based use.
